

Simplify Remote Installations and Cut Project Cost

Deploying IP cameras, intercoms, or access control panels on poles often means managing multiple vendors for enclosures, power supplies, and switches. Each extra component adds cost, delay, and risk.

KBC's PWB Series PoE Kits combine power conversion, PoE output, and connectivity into a single, factory-tested solution—reducing sourcing complexity, installation time, and maintenance overhead.

The **PWB Series** provides consistent, reliable PoE for remote devices and supports **wireless point-to-point** or **point-to-multipoint** bridge links. Select models include **SFP ports** for direct fiber integration, giving installers flexibility for mixed-media networks.

The result: **fewer site visits, faster deployment, and a lower total cost of ownership.**

Pair with WES5 for High-Speed Wireless Transmission

The **WES5** delivers up to **2.4 Gbps throughput** with industrial-grade reliability. Its rugged, outdoor-ready design extends secure network connectivity to remote or hard-to-reach areas—ideal for surveillance, transportation, energy, and industrial sites.

Configurable for **point-to-point, point-to-multipoint, or local user-managed Wi-Fi** access, the WES5 offers exceptional range and stability without needing direct switch access.

TRANSPORTATION | SECURITY & SURVEILLANCE | INDUSTRIAL AUTOMATION | ENERGY & UTILITIES
